ABOUT ME

I try to live by engaging in things that I can control. I can't control the outcome of most things, but I can control the effort I put in. It works in work and programming as well as in doing sports and socializing with friends and family.

LANGUAGES

Swedish, English - Fluent

LICENCE

B - Drivers licence

TLP 10 (A and B) - Forklift

Programming

Swift, Javascript and React are my top qualities but I have valuable experience in Nodejs, Angular, Java, sql and NoSql for example.

[Some swift projects of mine.](#)

ASSIGNMENTS AND PROJECTS

GESHDO IT-Consultant, Malmö

Aug 2019 - Oct 2019

I worked at Securitas with one of their internal applications. I worked with two senior developers using C#, MS Sql and a javascript framework called knockout.js. For the most part I worked on the frontend. I was not looking for a job at the time and decided to quit before they had invested too much in me.

Movieskip - MEAN-stack, Ionic, React Native, Swift 2017 -

A mobile application which has been my biggest project I've made. At first I made it as a web app, then as mobile app with a node server, then a react native app and at last a native Swift app with Firebase for storage and user authentication. The version made with ionic has been published to both IOS and Android app store. [Have a look at the latest version](#)

React Native App - Grebbestad Varv

Jan 2019 - Apr 2019

I made an app for a business selling boats and other marine related things. It helped calculating what it would cost renting space for different kinds of boats.

BRA Byggvaror Outlet

May 2016 - Aug 2017

I was involved in most of the parts of the business. Mostly it was about serving customers which was really fun. There was also a lot of work related to logistics alike. I was the person who spent most time on sight and got different responsibilities in making the cash register work properly, som bookkeeping and updating the website, using a tool called Joomla. I was offered a more outspoken managerial role but declined to go and study instead.

Nordbo Workwear

Aug 2016 - Aug 2017

My boss at BRA hired me to help out with his e-commerce store he ran on the side. For the most part I updated the system with new articles, also using Joomla. It also involved other work related to a small e-commerce store like packaging, ordering and keeping inventory.

LN Personal - Lagerarbete

Jan 2015 - Jul 2015

Doing regular warehouse work emptying/filling containers and packaging things. I worked at different companies like DHL and Kappahl.

Jally - Content Copywriter

Oct 2011 - May 2012

Writing articles in searching engine optimization (SEO) purposes. A extra job I had alongside my highschool studies.
